

Tasks:

You are about to test a prototype, after going through the tasks, please give a constructive critique on the graphics, typography, and the experience of the interface.

1. At the home page, choose an option and mark down which of the two buttons, you clicked first:
 - i. Explore:
 - ii. History:
2. If you chose the explore button, go through the islands (except for Maui for it is still under construction). If you chose the history button, there will be instructions.
3. If you went through the explore options, you can choose to go through the other option from the home page by clicking the history button in the nav bar. If you chose the history button, the explore button is still under construction. You will have to use the back buttons to go back to the home page to choose the explore option.
4. Please give constructive criticism.

Questions:

1. Do you know what this interface is about?
2. At the homepage, why did you choose the option you first chose?
3. What else can I add to improve the look of the interface or improve the experience of the interface?
4. Is the typography acceptable?
- 5.
